

JOB OFFER

Job Title: Research Chemist/PostDoc

Job Type: Full-time, Seniority Level: Associate

Location: Potsdam, Germany

About AnalytiCon Discovery

AnalytiCon Discovery is the world's leading company in natural product research. With its proprietary technology platforms and unique natural product chemistry expertise, the company is creating value for the pharmaceutical, agrochemical and food industries.

Position Summary

- As a research chemist at AnalytiCon, you are responsible for the independent execution of complex organic syntheses. You will be in charge of the planning and documentation of the experiments.
- With the help of state-of-the-art laboratories, you will perform technical tasks and develop innovative approaches to achieve defined goals within a project.
- You will independently monitor and qualify equipment in the laboratory, and conduct general laboratory activities.

Your profile

- Experience in multistep synthesis including processing and separation. You must be familiar with standard techniques used in OC labs.
- Good knowledge of standard analytical methods and their application.
- Acclimated with the proper documentation of results.
- Capable of working self-reliantly.
- Driven character, team spirit and good communication skills.
- Excellent command of English, both spoken and written. Equal skills in German are desirable.
- Holder of a German residence permit.
