

NATx

NATx Macrocycles

Macrocycles are considered preferred systems to target biological space which is usually difficult to address with small molecules.

This selection is a rich source of **macrocycles** displaying an unmatched wealth of structural diversity. The range goes from peptide like structures to molecules resembling more to macrocides thus covering a huge area in both PhysChem as well as in structural space.

2,368 compounds from our library originating from 10 diverse scaffolds are populating the AnalytiCon **macrocyclic** space. All compounds can be cherry picked. Customized sets can be assembled and delivered in your preferred format. All compounds are above 85 percent purity.
