

Potsdam based AnalytiCon Discovery GmbH is one of the leading companies in the field of natural product research and development and therefore a partner of choice for the pharmaceutical, cosmetic and nutrition industry. AnalytiCon's interdisciplinary team has a unique expertise in isolating, characterizing and synthesizing natural products as well as developing them to market-ready products.

AnalytiCon Discovery has the following vacancy for the next possible starting date:

## **Chemist / Biochemist as Head of the Compound Management Department (m/f/d)**

### **Your tasks:**

- Head of the compound management department, with more than 50,000 small molecules produced in-house available to our partners and customers in the field of drug discovery and ingredient research,
- Coordinating and processing orders,
- Collaborate with scientists from multiple disciplines to design and implement workflows,
- Managing a team of up to 6 technicians/research associates,
- Optimize processes for automation,
- Develop methods and perform troubleshooting for liquid handlers, automatic compound stores, automatic weigh station, liquid handlers and other automation,
- Organize and evaluate QC of compounds via analytical HPLC and/or LCMS, Responsible for preparation of shipping manifests and documentation for international shipment.

### **Your qualifications and skills:**

You have successfully completed a master's degree in chemistry or biochemistry and have work experience, for example in quality control, analytical characterisation or in high throughput screening of compounds. You have practical experience with the identification and purity determination of synthetic and natural low molecular compounds with high attention-to-detail. You can competently use Microsoft Office applications, especially Excel and Access. You enjoy working with databases and optimizing them. You are fluent in written and oral communication in German and English.

You enjoy planning, coordinating and optimizing laboratory work, have an excellent understanding of underlying processes and logistic talent. You are a communicative team player able to organize yourself independently and can also work efficiently and reliably under pressure.

### **Have we sparked your interest?**

Then we look forward to receiving your complete application which should be sent by email to the following address:
